## EDUCATION

### Hanyang University

B.S. in Data Science

Includes 2 years of mandatory military service

- GPA: 4.05/4.5

Mar 2022 – Feb 2028

(expected)

## RESEARCH INTERESTS

Embodied AI, VLA

## PROJECTS

### SigLIP-Based Multimodal RAG Travel Recommendation System

Dec 2025 – Jan 2026

Multimodal AI Bootcamp, Hanyang University

- Fine-tuned SigLIP and Qwen3-Omni to build a multimodal RAG system for domestic travel recommendation.
- Built a curated dataset of Korean travel destinations from WIT using rule-based filtering and manual cleaning.
- Reduced inference-time, GPU and VRAM usage by offloading embedding and retrieval to CPU, reserving GPU resources for multimodal generation and long-context processing.

### Artworks Artist Classification - 1st Place out of 110

Oct 2025 – Dec 2025

Internal Kaggle Competition, Hanyang University

- Addressed an artwork artist-classification task on a severely imbalanced dataset, where minority-class sensitivity were critical.
- Built a ConvNeXt-V2 pipeline with MoCo-v2 pretraining to strengthen visual representations under limited resources, leveraging a queue-based contrastive objective to approximate large-batch effects.
- Improved generalization with imbalance-aware training and inference strategies, including focal-style objectives, ensembling, and multi-crop test-time augmentation.

## EXPERIENCES

### Undergraduate Research Assistant

Mar 2026 – Present

Hanyang University / BAIK LAB

- Advisor: Sungyong Baik
- Surveying recent work on robotics and embodied AI, with a focus on VLA models and policy learning.

## AWARDS

### Artworks Artist Classification: 1st Prize (1st/110)

Oct 2025 – Dec 2025

Internal Kaggle Competition, Hanyang University

## EXTRACURRICULAR ACTIVITIES

### RoRO

Feb 2026 – Present

Hanyang University

- Participated in robotics club study sessions on VLA models and embodied AI.
- Contributed to paper-reading discussions on multimodal perception, action generation, and robot learning.

## SKILLS

- **Programming:** Python, R
- **Data & ML:** PyTorch, NumPy, pandas
- **Tools & Systems:** Git, Linux, W&B, uv

## RELATED COURSES

- **Linear Algebra:** A+
- **Discrete Mathematics:** A+
- **Machine Learning:** A+
